FOR IMMEDIATE RELEASE

TapRoot Systems, Inc. delivers Mobile WiMAX for Windows Mobile® devices

RESEARCH TRIANGLE PARK, NC -- February 15th, 2007 – TapRoot Systems Inc., a leading provider of embedded software solutions and reference platforms for smartphones today announced Windows Mobile 6.0 support for Mobile WiMAX.

TapRoot Systems has developed software components to support and manage the discovery; authentication and encryption for Mobile WiMAX networks on a Windows Mobile handset. Integration-ready components and services include Mobile WiMAX Security Suppliants, Mobility Management (Mobile WiMAX, WLAN, cellular telephony), Power Management and device drivers.

“We continue to position ourselves well in the smartphone space by offering tangible products across current and emerging markets like Mobile WiMAX” said Justin Helmig, Director of Product Management at TapRoot Systems. “Our expertise and leadership in the WLAN and Telephony space, has enabled us to develop Mobile WiMAX solutions that facilitate fastest time to market for our customer’s devices”.

Global WiMAX infrastructure spending will rocket from \$655m today to \$7.36bn by 2009, just three short years away, driving the demand for innovative Mobile WiMAX devices according to a brand new report from Rethink Research. In addition, WiMAX spending will go from 22.5% of all broadband wireless spend in 2006 to be the dominant platform in the market, with a 63% share. Wireless will increase its share of the broadband market from 2% to around 17% in the early years of the next decade (2010).
